## INNOVATIVE, EFFECTIVE, RELIABLE SOLUTIONS AND SERVICES TO GUARANTEE

### MILKING TROLLEYS

The **Milkline** milking trolleys combine all the components necessary to mechanically milk an animal in a single unit: vacuum pump, control valve, vacuum tank, pulsator, milking unit, milking bucket or milk-churn, connection pipes. Available in many configurations and for different types of animals.

### MILKING UNITS

**Milkline** designs and develops the most advanced solutions to milk your animals: from liners to pulsators, from milk meters to milk flow sensors, from milking clusters to control units.

A wide range of milking components is available to ensure the best milking performance, animal welfare and milk quality.

### MILKING CONTROL UNITS

**Milkline's** milking control units for milking point control and management are suitable for new installations or existing milking parlour upgrades. Different versions are available: from simple and basic solutions to the most advanced ones fully integrated with the herd management software, giving the farmer access to animal data.

### VACUUM AND MILK LINES

**Milkline** offers a complete range of vacuum systems and milk transfer to suit different herds and milking systems. Thanks to the special manufacturing procedures and strict controls observed, the Milkline's vacuum and milk transfer systems are high reliable low noise and durable and allow energy saving.

## GUARANTEE A SAFE AND HIGH QUALITY PRODUCTION FOR THE FARMER

### MILKING PARLOURS FOR COWS

Milkline's milking parlours use first-rate technology to guarantee high-performance milking, with top-quality results and ease of use for the customer.

Milkline's qualified and professional network of suppliers and distributors will support you on system planning, installation and commissioning.

### MILKING PARLOURS FOR SHEEP AND GOATS

Milkline's milking parlours for sheep and goats are specifically designed to allow fast, orderly animal flow and efficient milking. The high-flow milking stall configurations increase milking rate and reduce operator workload, while also creating a pleasant and comfortable milking environment. You can choose among several configurations to best satisfy your needs.

### MILKIT SMART

MILKIT is the complete plug-and-play system for single milking point management. All the electronic and electromechanical milking equipment is pre-assembled and pre-wired in a compact and robust stainless steel cabinet, ensuring simple and fast installation, maximum protection of the components and easy cleaning. The handy and plug-and-play connectors allow quick and efficient milking point wiring.

### HERD MANAGEMENT

Milkline's herd management system provides real-time monitoring and control over the milking process as well as the reproductive, health and nutritional status of each animal. Thanks to the modularity and flexibility of the components available, you can choose the solution that best suits your farm.

# MILKLINE®

*is present in over 30 countries (3 continents) with more than 70 employees. The head office is located in Podenzano, in the province of Piacenza (Italy), in the heart of Italian milk production. Since 1976 MILKLINE is the Italian leader in the design, manufacture and supply of machinery and equipment for dairy farming. Today we are the leading brand for milking and management of dairy farms around the world.*
