MILKLINE®

MILKLINE CONSUMABLES CRUCIAL ELEMENTS THAT GIVE MORE VALUE TO YOUR MILK

The work of a dairy farmer ranges from the simple replacement of milking filters to cleaning teats up after milking, and it depends not only on the ability of those who do this job, but also on the quality of the products used.

For this reason, the entire range of **MILKLINE** supplies has been designed, developed, and manufactured in such a way as to ensure excellent production quality with perfect and continuous functionality of all milking equipment.

PROTECT YOUR MILK USING ORIGINAL MILKLINE CONSUMABLES

MILKLINE CONSUMABLES

DETERGENT FOR MACHINERY AND EQUIPMENT

In order to obtain high quality milk, daily cleaning and sanitization of the entire inner workings of the farm is necessary.

Milking machinery, liners, tanks, equipment, floors, walls are vectors for the transmission and spread of diseases.

MILKLINE offers a wide range of detergents for all types of machinery and equipment.

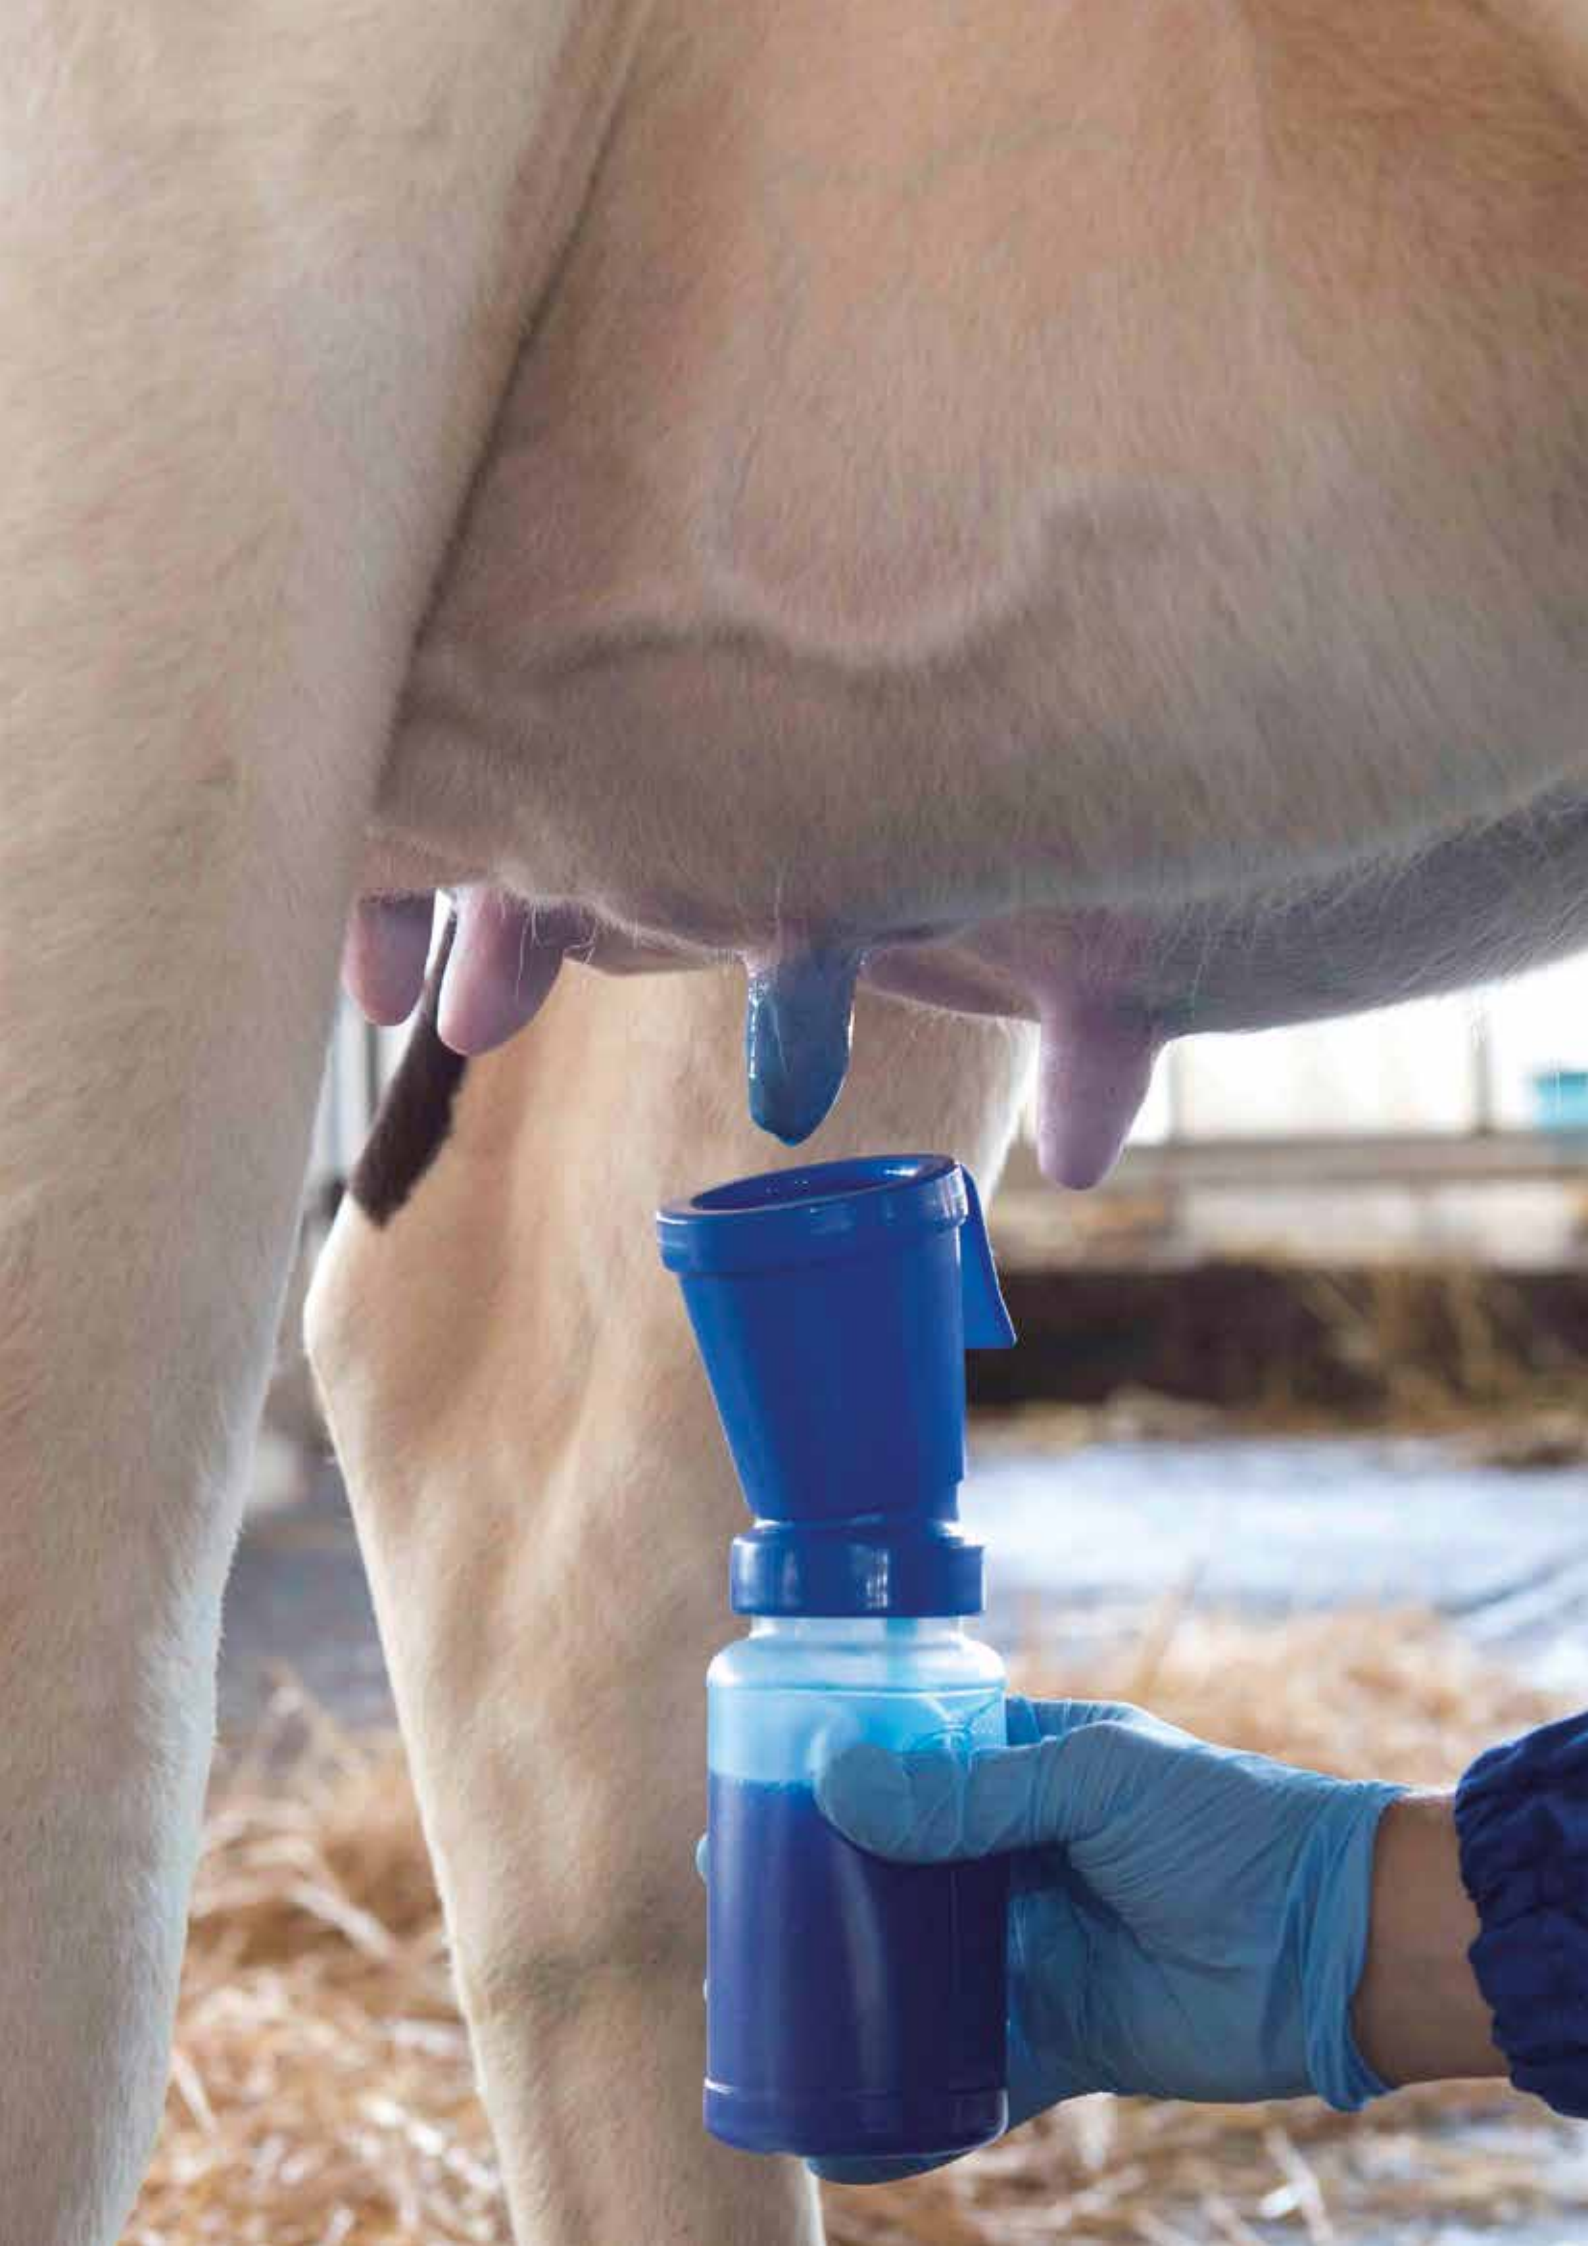

HYGIENE FOR UDDERS AND HOOVES

It has been shown that accurate and preventive hygiene of the animals improves the quality and safety of the milk and reduces the incidence of pathologies.

MILKLINE offers optimal solutions for the hygiene and care of the udder and also for the treatment of cows' hooves; the products are aimed at ensuring the health and wellness of the animals.

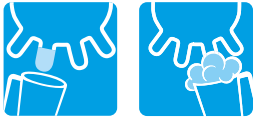

MILKLINE CONSUMABLES

DIP CUPS

MILKLINE dip cups are high quality, and easy to handle. They are used to clean teats, a fundamental operation in any mastitis control program. Using **MILKLINE** dip cups maximizes the milk quality and the farm profitability.

They are available in different models: non-return with single or double tubes, foaming or pneumatic dip cups.

PROTECTIVE AND SOOTHING CREAMS

The focus on accurate and adequate udder health is the first step in ensuring the production of healthy and high-quality milk and reducing the occurrence of mastitis and bacterial infections.

MILKLINE's creams and soothing products, thanks to their composition of vegetable oils and natural extracts, ensure healthy udders by preventing potential tissue damage caused by mechanical issues, aiding in the healing of minor wounds, protecting against dermatological disorders, exposure to harsh weather conditions, and assisting in the recovery from subclinical mastitis.

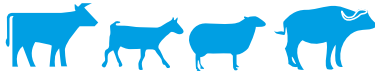

MILKLINE CONSUMABLES

MILK FILTERS

MILKLINE milk filters are able to protect milk quality and provide useful information on the machinery status and on the milking procedures adopted.

They are certified for alimentary use and they are available in various sizes and formats: sewn, welded and discs.

BRUSHES

MILKLINE brushes are made from high quality materials, which are extremely durable and strong. These materials are heavy duty, heat resistant, corrosion resistant, and moisture resistant; they are resistant to deterioration, and especially to bacterial contamination.

The propylene bristles is synonymous with durability and also with extreme adaptability; they can be used on wet or dry, indoors or outdoors, over rough or smooth surfaces.

MILKLINE CONSUMABLES

LINERS

MILKLINE original liners are developed and designed to adapt to different types of teats and udders in order to encourage maximum milk production.

Thanks to their special elasticity and softness, **MILKLINE** liners adhere perfectly to the teat, ensuring a vacuum seal and keeping the udder healthy.

MILKLINE offers a wide range of liners made of high quality materials which prevent harmful substances, both to humans and animals, from entering the milk.

TUBES

The right choice of a tube is fundamental in order to improve milking performance.

MILKLINE original tubes are made of the best materials in compliance with the current requirements for foodstuffs. They are highly resistant to milk acids, the aggressive action of detergents, atmospheric agents and high / low temperatures.

MILKLINE offers a wide range of milk and vacuum tubes, in various sizes and materials, which can adapt to the needs of any dairy farm.
